2.1P: In Person Check-in 1 – Answer Sheet

1. Briefly describe your prior experience with programming.

   I've dabbled in programming a bit before, mostly creating simple scripts and experimenting with basic coding concepts. Nothing too deep, but I'm excited to learn more.

2. Based on what you have seen so far, what do you think will be most challenging about this unit?

   From what I've seen in the course outline, transitioning from procedural programming to the world of Object-Oriented Programming (OOP) might be a bit challenging. Especially, in this week, it's quite hard to cope with c#, which I have learned for nearly 2 weeks.

3. What can you do to prepare yourself for that challenge (resources you can use, approach to studying etc.)?

   I've been watching online tutorials and going through introductory books on C# to brush up on my coding skills. I find that practical exercises, like building simple applications, really help me grasp the concepts better.

4. Is there anything you think the teaching staff should know to best help you this semester?

   If I hit a roadblock, I won't hesitate to reach out to the teaching staff. I'm planning to attend office hours regularly and maybe join study groups to get different perspectives on the topics. I also hope they understand that I might need a bit of extra guidance as I get used to this new way of thinking about code.
